

TECHNOLOGY AT WBAIS

MISSION

The mission of the WBAIS technology program, a dynamic and forward thinking initiative, is to enable students and the school community to become competent, confident, socially responsible lifelong learners and users of technology by facilitating and supporting its comprehensive, innovative, and integrated use.

SKILL EXPECTATIONS

WBAIS strives for a purposeful and comprehensive integration of technology. We have implemented numerous school-wide strategies - such as the one-to-one laptop program - and continue to imagine and initiate educational, technical innovation.

WBAIS faculty embraces and envisions technology as an integral part of their commitment to lifelong learning. Teachers are required, but not limited to:

- Integrate technology into curriculum, systematically and consistently
- Develop and manage online learning materials
- Use web-based administrative tools for grading, attendance, and communication
- Use a portable computing device daily (laptop, netbook, tablet)
- Independently acquire the use of new technologies, integrating into the classroom as appropriate
- Effectively manage technology in the classroom
